Subject index

Acetylacetone
Silver ion–solvent complexing in acetylacetone and ionic Gibbs energies of transfer (Sakamoto et al.) 181
Adatom-modified gold electrodes
Mechanistic study of the electrooxidation of ethylene glycol on gold and adatom-modified gold electrodes in alkaline medium (Kadirgan et al.) 41
Adsorption isotherms
The standard adsorption Gibbs energy from several adsorption isotherms (Torrent, Sanz) 207
1-Alkyl-3,5-di(alkylcarbamoyl)pyridinium ion
Electrochemical behaviour of 1-alkyl-3,5-di(alkylcarbamoyl)pyridinium ions as a model of the NAD^+/NADH system in aqueous solution (Leprêtre et al.) 63
Aromatic derivatives
The cathodic scission of aromatic derivatives in the presence of nitrones as spin markers: on the reactivity of nitroxides in weak H-donor solvents. Part 1. Use of dimethyl sulphoxide (Simonet et al.) 163

Bromine solutions
On the etching of GaP single crystals in aqueous bromine solutions (Goossens et al.) 133

Carbon
Metal electrodeposition on semiconductors. Part I. Comparison with glassy carbon in the case of platinum deposition (Allongue, Souteyrand) 217
Carbon paste electrodes
Characterization of the microdistribution of conductive and insulating regions of carbon paste electrodes with tunneling microscopy (Wang et al.) 265
Charge transfer
Charge transfer across superconductor/ionic conductor interfaces: comparison between theory and experimental results (Pinkowski et al.) 253
Current oscillations
Current oscillations during formic acid oxidation on Pt(100) (Raspel et al.) 279
Current–voltage method
The $C-V$ method for characterizing ISFET or EOS devices with ion-sensitive membranes (Fabry, Laurent-Yvonnou) 23
Cyclic voltammetry
Characterization of the electrolytically induced isomerization of 1-phenyl-1-hexyne. Part I. Cyclic voltammetry and digital simulation (Stemple, Peters) 89

Difference Raman spectroscopy
Difference Raman spectroscopy for "in-situ" analysis of electrode surfaces (Melendres) 273
Digital simulation
Characterization of the electrolytically induced isomerization of 1-phenyl-1-hexyne. Part I. Cyclic voltammetry and digital simulation (Stemple, Peters) 89
Dimethyl sulphoxide
The cathodic scission of aromatic derivatives in the presence of nitrones as spin markers: on the reactivity of nitroxides in weak H-donor solvents. Part 1. Use of dimethyl sulphoxide (Simonet et al.) 163
Dipole adsorption
Another comment on the anomalous behaviour of the inner-layer capacity at low electrolyte concentrations (Outhwaite, Molero) 239

EC-catalytic mechanisms
The EC-catalytic mechanism at the rotating disk electrode. Part I. Approximate theories for the pseudo-first-order case and applications to the Fenton reaction (Nolan, Plambeck) 1

Electrolyte oxide semiconductor
The $C-V$ method for characterizing ISFET or EOS devices with ion-sensitive membranes (Fabry, Laurent-Yvonnou) 23
Etching
On the etching of GaP single crystals in aqueous bromine solutions (Goossens et al.) 133
Ethylene glycol
Mechanistic study of the electrooxidation of ethylene glycol on gold and adatom-modified gold electrodes in alkaline medium (Kadirgan et al.) 41

Fenton reaction
The EC-catalytic mechanism at the rotating disk electrode. Part I. Approximate theories for the pseudo-first-order case and applications to the Fenton reaction (Nolan, Plambeck) 1
Formic acid
Current oscillations during formic acid oxidation on Pt(100) (Raspel et al.) 279
Frozen solutions
An ESR study of solute motion in a liquid microphase: confirmation of a model for electrochemical reactions in frozen solution (Gosser Jr. et al.) 285

Gallium phosphide
Dissolution experiments at irradiated GaP electrodes by means of labelled phosphorus (Landsberg et al.) 151
On the etching of GaP single crystals in aqueous bromine solutions (Goossens et al.) 133
Gas diffusion hybrid polymer electrode
The characteristics of a gas diffusion hybrid polymer electrode in the oxygen reduction reaction (Kawashima et al.) 123
Gibss energies
Silver ion–solvent complexing in acetylacetone and ionic Gibbs energies of transfer (Sakamoto et al.) 181
The standard adsorption Gibbs energy from several adsorption isotherms (Torrent, Sanz) 207
Glassy carbon
Metal electrodeposition on semiconductors. Part I. Comparison with glassy carbon in the case of platinum deposition (Allongue, Souteyrand) 217
Gold
Mechanistic study of the electrooxidation of ethylene glycol on gold and adatom-modified gold electrodes in alkaline medium (Kadirgan et al.) 41

Heavy water
Surface and electrochemical characterization of Pd cathodes after prolonged charging in $LiOD + D_2O$ solutions (Ulmann et al.) 257
Hybrid polymers
The characteristics of a gas diffusion hybrid polymer electrode in the oxygen reduction reaction (Kawashima et al.) 123
Hydrodynamic voltammetry
Characterization of the electrolytically induced isomerization of 1-phenyl-1-hexyne. Part II. Hydrodynamic voltammetry with rotating disk and ring–disk electrodes (Stemple, Peters) 109

Inner-layer capacity
Another comment on the anomalous behaviour of the inner-layer capacity at low electrolyte concentrations (Outhwaite, Molero) 239
Ionic conductors
Charge transfer across superconductor/ionic conductor interfaces: comparison between theory and experimental results (Pinkowski et al.) 253
Ionic Gibbs energies
Silver ion–solvent complexing in acetylacetone and ionic Gibbs energies of transfer (Sakamoto et al.) 181
Ion-sensitive field effect transistors
The $C-V$ method for characterizing ISFET or EOS devices with ion-sensitive membranes (Fabry, Laurent-Yvonnou) 23
Irradiated GaP electrodes
Dissolution experiments at irradiated GaP electrodes by means of labelled phosphorus (Landsberg et al.) 151
Isomerization
Characterization of the electrolytically induced isomerization of 1-phenyl-1-hexyne. Part I. Cyclic voltammetry and digital simulation (Stemple, Peters) 89
Characterization of the electrolytically induced isomerization of 1-phenyl-1-hexyne. Part II. Hydrodynamic voltammetry with rotating disk and ring–disk electrodes (Stemple, Peters) 109

Labelled phosphorus
Dissolution experiments at irradiated GaP electrodes by means of labelled phosphorus (Landsberg et al.) 151
Liquid microphase
An ESR study of solute motion in a liquid microphase: confirmation of a model for electrochemical reactions in frozen solution (Gosser Jr. et al.) 285
Lithium hydroxide
Surface and electrochemical characterization of Pd cathodes after prolonged charging in $LiOD + D_2O$ solutions (Ulmann et al.) 257

Membranes
The $C-V$ method for characterizing ISFET or EOS devices with ion-sensitive membranes (Fabry, Laurent-Yvonnou) 23
Metal electrodeposition
Metal electrodeposition on semiconductors. Part I. Comparison with glassy carbon in the case of platinum deposition (Allongue, Souteyrand) 217
Metal terpyridyl redox centers
Anodic electropolymerization of films of polypyrrole functionalized with metal terpyridyl redox centers (Collin et al.) 75
Microdistribution
Characterization of the microdistribution of conductive and insulating regions of carbon paste electrodes with scanning tunneling microscopy (Wang et al.) 265

NAD^+/NADH system
Electrochemical behaviour of 1-alkyl-3,5-di(alkylcarbamoyl)pyridinium ions as a model of the NAD^+/NADH system in aqueous solution (Leprêtre et al.) 63
Nasicon/water interface
Na^+ exchange at the Nasicon/water interface (Siebert et al.) 245
Nitrones
The cathodic scission of aromatic derivatives in the presence of nitrones as spin markers: on the reactivity of nitroxides in weak H-donor solvents. Part 1. Use of dimethyl sulphoxide (Simonet et al.) 163
Nitroxides
The cathodic scission of aromatic derivatives in the presence of nitrones as spin markers: on the reactivity of nitroxides in weak H-donor solvents. Part 1. Use of dimethyl sulphoxide (Simonet et al.) 163

Oxygen
The characteristics of a gas diffusion hybrid polymer electrode in the oxygen reduction reaction (Kawashima et al.) 123

Palladium
Surface and electrochemical characterization of Pd cathodes after prolonged charging in $LiOD + D_2O$ solutions (Ulmann et al.) 257
1-Phenyl-1-hexyne
Characterization of the electrolytically induced isomerization of 1-phenyl-1-hexyne. Part I. Cyclic voltammetry and digital simulation (Stemple, Peters) 89
Characterization of the electrolytically induced isomerization of 1-phenyl-1-hexyne. Part II. Hydrodynamic voltammetry with rotating disk and ring–disk electrodes (Stemple, Peters) 109
Phosphorus
Dissolution experiments at irradiated GaP electrodes by means of labelled phosphorus (Landsberg et al.) 151
Platinum
Current oscillations during formic acid oxidation on Pt(100) (Raspel et al.) 279
Metal electrodeposition on semiconductors. Part I. Comparison with glassy carbon in the case of platinum deposition (Allongue, Souteyrand) 217
Polypyrrole
Anodic electropolymerization of films of polypyrrole functionalized with metal terpyridyl redox centers (Collin et al.) 75
Pseudo-first-order mechanisms
The EC-catalytic mechanism at the rotating disk electrode. Part I. Approximate theories for the pseudo-first-order case and applications to the Fenton reaction (Nolan, Plambeck) 1

Raman spectroscopy
Difference Raman spectroscopy for "in-situ" analysis of electrode surfaces (Melendres) 273
Ring–disk electrodes
Characterization of the electrolytically induced isomerization of 1-phenyl-1-hexyne. Part II. Hydrodynamic voltammetry with rotating disk and ring–disk electrodes (Stemple, Peters) 109
Rotating disk electrodes
The EC-catalytic mechanisms at the rotating

disk electrode. Part I. Approximate theories for the pseudo-first-order case and applications to the Fenton reaction (Nolan, Plambeck) 1
Characterization of the electrolytically induced isomerization of 1-phenyl-1-hexyne. Part II. Hydrodynamic voltammetry with rotating disk and ring–disk electrodes (Stemple, Peters) 109

Scanning tunneling microscopy
Characterization of the microdistribution of conductive and insulating regions of carbon paste electrodes with scanning tunneling microscopy (Wang et al.) 265
Scission
The cathodic scission of aromatic derivatives in the presence of nitrones as spin markers: on the reactivity of nitroxides in weak H-donor solvents. Part 1. Use of dimethyl sulphoxide (Simonet et al.) 163
Semiconductors
The $C-V$ method for characterizing ISFET or EOS devices with ion-sensitive membranes (Fabry, Laurent-Yvonnou) 23
Metal electrodeposition on semiconductors. Part I. Comparison with glassy carbon in the case of platinum deposition (Allongue, Souteyrand) 217
Silver
Silver ion–solvent complexing in acetylacetone and ionic Gibbs energies of transfer (Sakamoto et al.) 181
Single crystals
On the etching of GaP single crystals in aqueous bromide solutions (Goossens et al.) 133
Sodium ion
Na^+ exchange at the Nasicon/water interface (Siebert et al.) 245
Solute motion
An ESR study of solute motion in a liquid microphase: confirmation of a model for electrochemical reactions in frozen solution (Gosser Jr. et al.) 285
Spin markers
The cathodic scission of aromatic derivatives in the presence of nitrones as spin markers: on the reactivity of nitroxides in weak H-donor solvents. Part 1. Use of dimethyl sulphoxide (Simonet et al.) 163
Superconductors
Charge transfer across superconductor/ionic conductor interfaces: comparison between theory and experimental results (Pinkowski et al.) 253
Surface analysis
Difference Raman spectroscopy for "in-situ" analysis of electrode surfaces (Melendres 273

Terpyridyl redox centers
Anodic electropolymerization of films of polypyrrole functionalized with metal terpyridyl redox centers (Collin et al.) 75

Zero charge point
Another comment on the anomalous behaviour of the inner-layer capacity at low electrolyte concentrations (Outhwaite, Molero) 239
